SUMMARY

React Native engineer with 11 years of software development experience, focused on products where mobile meets real-world operational complexity: payments, maps and navigation, logistics, and workforce tools. Owns delivery end to end - architecture, Expo CI/CD, and App Store and Google Play releases. Six years of experience as a senior tech lead, mentoring developers and guiding production delivery.

EXPERIENCE

Independent Software Consultant - React Native & Mobile Architecture

2023 - Present | Clients: OutsideHire, Narrasoft, Bizarre Business Solutions, Fuselabs.ai, Bless Payments

- Owned frontend delivery for customer-facing payment experiences at OutsideHire, including a reusable payment SDK, customer dashboards, and custom portals.
- Led cross-platform React Native solutions for Narrasoft, implementing map and navigation functionality plus AI-powered voice experiences for iOS and Android.
- Architected React Native applications and supporting web systems for Bizarre Business Solutions; established Expo CI/CD workflows and built Next.js dashboards and API services.
- Built production React Native applications at Fuselabs.ai, contributing to application architecture, business logic, OpenAI integrations, supporting dashboards, and automated delivery.
- Developed the mobile payments frontend for Bless Payments, including React Native UI and animation, KYC-related functionality, and CI/CD support.

Senior Tech Lead - Creative Interlace

2017 - 2023 | 6 years

- Led development of Allied Trucking's driver platform, building React Native tools with Google Maps-based location and movement monitoring.
- Designed application architecture and delivered monitoring and ticketing dashboards supporting transportation operations.
- Introduced CI/CD practices, mentored developers, supported project planning, and translated business processes into maintainable technical solutions.

Senior Software Engineer - Cloudstaff

2015 - 2017 | 2 years

- Served as Lead Project Developer for Healthy Mummy, developing React Native mobile functionality and management dashboards for meal and exercise planning.
- Implemented CI/CD processes supporting reliable application delivery.

SHIPPED PRODUCTS

PetraFi - Trucking and trip management platform

Trip-mile calculation, toll estimation, nearby fuel pricing maps, fuel-cost modeling, proposal generation, and pricing tracking.

Mangan.ph - Food delivery, Philippines | iOS and Android

End-to-end production food delivery application, published and maintained on both the Apple App Store and Google Play.

Healthy Mummy - Health and lifestyle | iOS and Android

Production mobile application for meal planning and exercise programs, published on Google Play and the Apple App Store.
